WARRANTY***

Exide Bikerz range of batteries has been specially designed for the new generation two-wheelers. Conforming to Japanese Standard JIS D5302, the batteries have special features that meet the arduous requirements of two-wheeler riding on Indian roads.

- Quick start and high reliability ensures trouble-free service.
- High performance, exclusive grid design, paste technology and alloy formulation enhances durability and reduces corrosion.
- Special separator (synthetic pulp bonded with glass mat) with low resistance prevents active material shedding and acts as a shock absorber.
- Sulphate retardant formula protects against detrimental effects of lead-in-through during idle storage, thereby enhancing life and performance.
- Strong and durable polypropylene container with additional reinforcement protects against shocks and bumps.

TECHNICAL SPECIFICATIONS OF EXIDE BIKERZ MOTORCYCLE & SCOOTER BATTERIES

Battery Type	Part Number	Capacity (AH) 10HR (REF)	CCA at -18°C as per SAE	Maximum Overall Dimensions (MM)			Nominal Weight (Kg)		Electrolyte Volume (Litres)	Charging Current (A)	Battery Layout

EXIDE
What about you?

When you return a used battery to any of our authorised dealers, we contribute on your behalf, to UNICEF's Child Environment Programme. It would not only empower the lives of the underprivileged children who are in dire need of water, sanitation and hygiene in schools, your contribution would help save our environment as well. Lead, a major component in your battery, if not handled responsibly, can harm the environment and our health. Return your used battery and make the world a better place, in more ways than one.
