

Low
Maintenance
TUBULAR
BATTERIES

For over 60 years, Exide Industries Limited, has pioneered battery technology in India. It is the only company in South and South East Asia which designs and manufactures lead acid batteries from 2.5 Ah to 20400 Ah. Exide offers the latest series of Tubular batteries, manufactured in its state of the art ISO 9000 : 2000 and ISO 14001 certified factories to fulfil the growing demand both in domestic and export market. Exide Low Maintenance Tubular cells conform to RDSO specification no. IRS : S : 88/2004

PRODUCT FEATURES

- HR/TP/PP Container ● Tubular Positive plates ● Pasted Negative Plates ● High tensile, acid resistant polyester gauntlets
- High Porosity Envelope Separators
- Electrolyte Level Indicator ● Microporous Ceramic Vent Plug.

LOW MAINTENANCE TUBULAR TECHNOLOGY

Exide Tubular Batteries have the spines or the positive plate support cast at high pressure (100 bar) in imported HADI machine which ensures void free structure and consistent grain orientation and can protect the plate support from anodic corrosion. This in turn ensures higher reliability and longer life. Exide Low Maintenance Tubular plates

are also cast with low antimony content which reduces the topping up frequency, making the batteries low maintenance type. This also keeps the float charging current at a lower value, thus minimises the total energy requirement needed to keep the battery in charged condition during standby float application.

APPLICATION

- IRS : S : 88 / 2004 (R.D.S.O.) ● Railway Signalling
