PRODUCT QUALITY OF MOTIVE POWER CELLS FROM EXIDE INDIA

A 24 V 2 PzB 150 Ah battery has been tested at an independent test lab in Germany.

The electrical results in capacity exceeded the rated capacities and EN norms. A tear down analyses of single cells was carried out. The quality of the electrodes, the overall assembling quality and the welding was very good.

A high number of batteries have been introduced to the market and do perform very well. Also a leading OEM in Germany is in final approval process for these products.

Overall the cells from EIL are of a very good quality standard and meet all requirements for the European market.
