

Public Policy

It is the policy of Exide Industries Limited to actively associate itself with associations, institutions, and organizations (both Governmental and non-Governmental) involved in framing policies or in a position to influence policy formulation by Government and Regulatory bodies. The Company however has prioritized its focus for such associations and restricts its involvement in certain cases subject to merit.

The Company is committed to positively influence associations, institutions, and organizations for

- Promotion of renewable energy with special attention to solar energy.
- Reduction of usage of hazardous materials in products and services.
- Safety and Health of all its stakeholders.
- Security, privacy and protection of data and information.
- Free, fair and transparent trade practices.
- Special care and support for disadvantaged classes, empowerment of women, education and health program for underprivileged children.
- Promotion of diversity and protection against all types of discrimination.
- Growth and development of Indian industries.
- Overall development of managerial staff and workmen.

The above interest areas are derived from the vision of the Company. This policy will be periodically reviewed in view of change in socio-political, economic and business environment.
